Fleet Team Asia

Optimized repair and maintenance costs

Virtual warehouse principle, trend analyses and early warning system

Carnival Maritime is the marine operations unit of the Costa Group in Hamburg, Germany.

All 25 cruise ships of Costa Crociere, Costa Asia and AIDA are monitored and supported in real time by this unit. The Fleet Operations Center (FOC) is the communication control center. In event of safety concerns, the FOC supports the captain and the crew.

Safety and responsibility are integral parts of the company's culture. Regular training and ship visits create a close working relationship between land and sea.
